

Shared ownership case study

silva

"My shared ownership home has made a massive difference to me. I feel that I now have a more secure and brighter future."

Michelle, Church Crookham

When Michelle was living in rented accommodation in Fleet, she wondered how she would ever be able to afford to buy a home of her own on her NHS salary. She wanted to stay in a location convenient for work and near to her friends.

She visited a website called www.helptobuysouth.co.uk and saw some of the properties listed by Silva Homes in her area.

She contacted Silva Homes to find out about the shared ownership scheme. She was told she would be added to a waiting list for new build homes and was sure this meant she would hear nothing further about it and put it out of her mind.

She was surprised to get a phone call a couple of months later with the offer of a brand new house in her preferred area. She was able to buy a 25% share of her new two bedroom home.

"The process was straightforward and I was guided through it every step of the way."

"This opportunity has given me a new lease of life and a renewed confidence in my future."

"My shared ownership home has made a massive difference to me. I feel that I now have a more secure and brighter future."

"I had so much going on in my life I forgot I had put my name down for a shared ownership property. I was delighted when I got a telephone call after such a brief time telling me there was a property in Church Crookham available to me."

"I would recommend the shared ownership scheme to anyone."

Home sweet home
